They explain human behaviours, the social environment, how change occurs and how change can be facilitated by the social worker in order to benefit 14. Applying Brief Solution Focused Therapy can be really effective with some people. How might theory be of use to social workers? The world of service users, including the internal (psychological) world and the external (social) world 12. MODELS OF SOCIAL WORK PRACTICE The Personal Social Services Model (PSSM) of social development practice seeks to extend to people everywhere a range of basic social services that are needed to enhance their capacity for social functioning. Curriculum Development Centre in Social Work Education, University Grants Commission, India recognized three elements of social work curriculum 1. To understand it, social worker need knowledge. Theories help explain why the problem is occurring and where the most efficient intervention should take place. Related to the first point, recognise that some theoretical approaches just don't work with some people. Explanation: theory can suggest how different observations might be linked in a framework that explains them. Cottrell provides a useful general definition: A theory is a set of ideas that helps to explain why something happens or happened in a particular way, and to predict likely prospectively predict" outcomes in the future. The SWM also views developmental social welfare practice as part of the worldwide movement that seek to promote social security and social justice for people everywhere The Social Development Model The Social Development Model (SDM) has its origins in community organization and community development practice and does, therefore, promote the fullest possible participation of people in determining both the means and goals of social development. what is going on, why important things. imagination, comprehension & creativity....in short, a radical shift in understanding "Knowledge as process" as opposed to "Knowledge as product" is needed. Common sense and wisdom on the job 21. It reduces costly ER visits and transportation costs to the doctor. Chatterjee & S.P. Robbins L.G. & H. The term model is also used when referring to violence, mental illness, teen a conceptual framework that is borrowed from one field and applied pregnancy, crime and racial in another, for example, the medical model (study, diagnose, treat) discrimination. Community- Through increased participation and "social animation" of the populace, the process Building through which community's realize the fullness of their social, political, and economic potential; the process through which communities respond more equitably to the social and material needs of their populations. Prediction: theory can indicate what might happen in the future. Virtual doctors also send prescriptions if needed and if appropriate. Description: theory provides a generally understood and shared language in which these observations can be organized and recorded. For other people, it leaves them cold. This can help us with service users and review and possibly change our practice in an attempt to for social work to be make the consequences more effective. The PSSM also seeks to ensure increased sensitivity and responsiveness on the part of human service providers to the special service needs of culturally diverse population groups. The cost of a telehealth visit is supposed to be a fraction of the cost you'd typically pay.The reality is that you may need to pay out of pocket about $40 for a virtual visit. 31. What do we mean by theory in social work? 1. Theories & serve? The use of social work theories in professional literature is rather ambiguous. Gutierrez B. A practice theory background knowledge and are functioning and it offers very serves as a road map for usually borrowed from other broad guidance on what may be bringing about a certain type of disciplines such as biology, important considerations in a change. Life means to face the demands of day to day life and realize the self. Both client and social worker are important when dealing with issues as the client is the expert of his own personal life. So, Social workers must achieve something other than technical proficiency, i.e. Understanding the human condition, not science. Lee, E. What makes us perceive the human Definition of problems in a particular social work How social work may? Thompson's definition includes similar ideas: An attempt to explain....a framework for understanding....a set of ideas linked together to help us make sense of a particular issue. 30. Sociological Theories, Modern Economic Theories, Contemporary Political Theories, Psychological Theories 9. Learn the pros, cons and limitations of telemedicine.What's a Telemedicine Provider?You may have a health care insurance plan that has access to a telemedicine program. They are step-by-step guides for client sessions. But our understanding of social work (especially with the faculty and students of social work colleges in non metropolitan cities of India and students with low level mastery of English language) is frozen with the simple definition of social work ...it is the art and science of helping the people to help themselves. These are: Grand, macro-level or global theories (sometimes known as meta-narratives), such as Marxism or Psychoanalysis, which claim to be able to explain everything in society, or all human behavior; Middle-range theories which focus on a limited range of issues – for instance, labeling theory, which from a social integrationist perspective aims to explain deviance; Micro theories developed to explain very small-scale situations – for instance, Relationships between staff and patients on a hospital ward. Note: Payne (1997) argues that social work theory succeeds best when it contains all three elements of perspective, theory and model. Several resource system may be needed to is to enable the people to use the social resources to meet their life tasks 5. 2 Whilst individual social work Using theory can help us to Theories can help us to themselves have different justify actions and make sense of a situation. Involving in the growth process and changes that is never ending and self-initiated Increasing one's capacity to achieve satisfaction in discreet thinking to sort out right and wrong 6. Social workers need to answer these questions To whom social before addressing others work is going to problems. Model Is a blueprint for action. 15. Skills and methods that are developed for the professional task 3. You use it every day. Observation: theory provides guidance on what a social worker might need to look out for when meeting people who use services or carers and their families. not one that categorizes People believe that science can furnish means, but not ends. Hospitals around the country also offer remote telehealth, allowing patients the chance to consult with the same doctor they'd see in person, according to MobiHealthNews, a digital health news outlet.Pros of TelemedicineThe overall premise of telemedicine is that you can meet with a doctor through video without having to leave your home. No more going to the emergency room or urgent care for immediate care. to certain methods of solving problems? Under this perspective, clients are generally the best experts about what types of helping strategies will be effective or ineffective. Being able to get a support for a decision. The goals associated with the SWM include: 1) self help; 2) mutual aid; 3) humanitarianism; and 4) the establishment of effective, preferably universal, systems of formal social provision. The New World Order Model The New World Order Model (NWOM) of social development practice is closely associated with the writings of "visionary" economists, political scientists, legal scholars, and environmentalists (Brandt Commission, 1981). The program comes from a telemedicine provider. Professional Research Knowledge other Disciplines Recognition & Knowledge about Raising Awareness Analyze of Different about Life Long Learning Social Theories regard to (Professional /Personal Processes Different Development) Social Work Fields Knowledge & Skills to Work Understanding of Legal & with Clients administration Learning about Procedures & Social Care Different Theoretical Institutions Functioning Approaches 23. Ex: Learning theory explains behavior on the basis of what organisms have learned from the environment. *Each subsystem impacts all other parts and whole system [Systems Perspective] How the family *Systems can have closed or open boundaries Includes: system affects the *Systems tend toward equilibrium Family Systems individual and *Individual functioning shapes family functioning and family systems can [Systems Perspective] family functioning create pathology within the individual across the life- *Boundaries, roles, communication, family structure influence family span functioning BEHAVIORISM & How individuals *Maintain & reaction to stimulation shape behavioral learning SOCIAL LEARNING THEORY develop cognitive *Knowledge is constructed through children physically and Includes: functioning and learn mentally acting on objects Cognitive theory, through acting on *Intelligence is an evolutionary, biological adaptation to Behavioral theory, their environment environment Social Learning theory [Social *Cognitive structures enable adaptation & organization Behavioral perspective] PSYCHODYNAMIC How inner *Unconscious and conscious mental activity motivate human THEORY energies and behavior Includes: external forces *Ego functions mediate between individual and environment Classical psychodynamic theory, interact to impact *Ego defense mechanisms protect individuals from becoming Ego-psychology, Object-relations emotional overwhelmed by unacceptable impulses and threats theory, development *Internalized experiences shape personality development and Self-psychology functioning [Psychodynamic Perspective] *Healing occurs through attention to transferences and the treatment relationship 33. Why should Social Workers be concerned about theory? 29. Major Theories – Used in Social Work Practice Systems Psychodynamic Social Learning Conflict Theory Theory Theory Theory Primary Perspectives Strengths Feminist Eco-Systems Current Social Work Practice Models Problem Task- Solution Narrative Cognitive Crisis Solving Centered Focused Behavioral In brief, social work practice models are like recipes. The term theory is loosely used in social work profession. Framework for Social Work Practice Social work draws from many frameworks for practice, but some of these frameworks have had more influence on the profession of social work than others. Major theories and concepts Objectives of teaching theories 1. learning political power, as well as theories related to specific Practice Model types of problems Practice Model is a set of concepts and principles used to guide such as poverty, family intervention activities. Many cultures have prescribed ways of talking about health and the human body and these factors impact a person's reaction and acceptance of health services. Major components of the NWOM are reflected in the recent social systems perspective and psychodynamic interest propositions or management. 3. It is important first to be clear what the term theory means in an academic sense. How theories help social workers? In promoting its social change objectives, the NWOM calls for the creation of a "new world order" based on: 1) recognition of and respect for the unity of life on earth; 2) the minimization of violence; 3) the satisfaction of basic human needs; 4) the primacy of human dignity; 5) the retention of diversity and pluralism; and 6) the need for universal participation in the process of attaining worldwide social transformation.. Theory is an "attempt to retrospectively explain and to What is theory? Practice Frameworks Orienting Theories Practice Perspective Practice Theory Orienting theories describe and This is a particular way of It offers both an explanation of explain behaviour and how and viewing and thinking about certain behaviours or situations why certain problems develop. Humanistic Perspective] How spiritual *There is an intrinent tendency to express innate potentials for love, development builds upon creativity, and spirituality that are being sought by the United Nations (UN, 1990; UN/ESCAP, 1992b), the United Nations Development Program (UNDP, 1997), World Bank 1997) and other leading international development assistance organizations. It describes what happens in practice in a general way. Parad Family Life Cycle Theory 5 Cognitive Psychodynamic Theory Humanistic (Existential/ Theories 6 Sigmund Freud, Eric Erickson Transpersonal) Alfred Adler 8 Abraham Maslow, 2 Jean Piaget Carl Rogers Family Systems Strategic Carl Jung 1 Therapy Behavioral 7 (Model) 10 Theories Object Relations Theory B.F. It is about protecting people and changing their lives, not about giving theoretical explanations of why they got into difficulties ... Social work is about social change at the individual as well as at community level. It can take about 20 minutes or less to have a virtual social work is defining personal pathology, liberal reform, Marxist, feminist) Formal written theories of Theories inductively practice (e.g. casework, derived from particular Theories family nature and values drawn upon by Theories for purposes of welfare (e.g. practitioners for defining explaining what upon by practitioners for 'functions' of social work social work is defining personal pathology, liberal reform, Marxist, feminist) Formal written theories of Theories inductively practice (e.g. casework, derived from particular Theories family therapy, group work); situations; can be tested to explaining how applied deductively; general see if they apply to do as social ideas may be applied to particular situations; also work particular situations unwritten practice theories constructed from experience Formal written social Practitioners' use of science theories and experience and general Theories empirical data (e.g. on cultural meanings (e.g. the explaining the personality, (e.g. the family as an institution, client work marriage, the family, race, normal behavior, good class, gender) parenting) 27. In social work, the term 'theory' covers three different possibilities: Provable explanations why something happens (Explanatory Theory) Organized description of activity in a structured form (Models) Ways of conceptualizing the world or a particular subject (Perspective) 13. Theories for social work Focus on clients and helping activities. Theories of social work describe which activities constitute social work, set aims for social work activities and explain why those activities are relevant and effective in meeting the aims 3. Theory may have its roots in education, psychology or management. 3. It is important first to be clear what the term theory means in an academic sense. How theories help social workers? In promoting its social change objectives, the NWOM calls for the creation of a "new world order" based on: 1) recognition of and respect for the unity of life on earth; 2) the minimization of violence; 3) the satisfaction of basic human needs; 4) the primacy of human dignity; 5) the retention of diversity and pluralism; and 6) the need for universal participation in the process of attaining worldwide social transformation.. Theory is an "attempt to retrospectively explain and to What is theory? Practice Frameworks Orienting Theories Practice Perspective Practice Theory Orienting theories describe and This is a particular way of It offers both an explanation of explain behaviour and how and viewing and thinking about certain behaviours or situations why certain problems develop. Humanistic Perspective] How spiritual *There is an intrinent tendency to express innate potentials for love, development builds upon creativity, and spirituality that are being sought by the United Nations (UN, 1990; UN/ESCAP, 1992b), the United Nations Development Program (UNDP, 1997), World Bank 1997) and other leading international development assistance personal experiences, and interpretation shape and THEORY minimize costs maintain behavior in the present [Rational Choice and maximize *Self-interest determines social exchange Perspective] rewards through *Unequal resources determine power inequities and reciprocity is essential social exchange *Six propositions: --Success proposition -- Stimulus proposition --Value proposition --Deprivation- satiation -- proposition --Aggression-approval proposition --Rationality proposition SOCIAL How socio cultural *All experience is subjective and human beings recreate themselves through an CONSTRUCTIONISM and historical on-going, never static process [Social Constructionist contexts shape *Knowledge is created through an interplay of multiple social and historical Perspective] individuals and the forces creation of *Social interaction is grounded in language, customs, cultural and historical knowledge contexts How individuals *All phenomenon, including the sciences, must be approached with doubt in create themselves the order to understand how people construct reality *Humans are self-interpreting beings 34. What is our of social work or responsibilities towards Why Social work? Levels & Definitions of Social Economic Development Practice in Social Work Levels of Major Purposes, Outcomes, or Processes Practice Associated with Levels of Social Work Practice Individual & Through "self help," "mutual aid," and "conscientization" strategies individuals and Group groups learn how to perceive and act upon the contradictions that exist in the social, Empowerment political, and economic structures intrinsic to all societies. Intervention: theory can provide ideas about what might bring about a change in the situation. Social Work Practice Social Policy as theory Encounters pressing need Seeks cultural Change Needs personally left Requires social action Requires immediate action Calla for long term strategy Focuses on interpersonal practice Stress on strategic planning/analysis 24. People may not know the existence of a resource system or may be hesitant to turn it for help for several reasons like distance, corruption, delay or poor quality etc 3. The vast majority of Social Workers function within one of four basic models of practice: the Personal Social Services Model (PSSM); the Social Welfare Model (SWM), the Social Development Model (SDM), and the New World Order Model (NWOM). 2. Medicare covers telemedicine in some instances, as well, reports American Telemedicine Association. Being able to discharge feelings Compare self help with empowerment Empowerment includes the following, or similar, capabilities:- The ability to make decisions about personal/collective circumstances The ability to access information and resources for decision-making Ability to consider a range of options from which to choose (not just yes/no, either/or.) Ability to exercise assertiveness in collective decision making Having positive-thinking about the ability to make changes Ability to learn and access skills for improving personal/collective circumstance. Thompson explains that there are different levels of theories. The ultimate goal of the SDM, however, is to guide collective action toward the elimination of all forms of violence and social oppression. eligibility criteria, gender, etc) 4. 8. Region- The process of working toward the integration of a geo-political region's social, Building political, economic, and cultural institutions at all levels of social organization. Why Social Work? Theories are overall explanations of the person-in-environment configuration. 4 sense" of the information. Why we subscribe generally convey is carried out? Social Work is a practical job. Ex: The behavioral model (based on learning theory) gives specific guidelines to for how to effect change. Whatever may be a definition of social work, it is normally based on certain perspectives and understanding of that perspective / theory will help us to appreciate that definition. Theory A general statement about the real world whose essential truth can be supported by evidence obtained through the scientific method. lead to social work For example the becoming more widely In work with individuals, information obtained as accountable and making use of the theories part of an assessment can ultimately more which may relate to their seem like a jumble of respected. It's a time- and cost-efficient way to see an appropriate doctor. In order to realize their life tasks people have to interact with three kinds of resource systems in the social environment 1. People are dependent on social systems to realize their aspirations and to cope with their life tasks. It may be logical to group these theories in broader categories e.g. Theories of evolution, Theories of personality (development) & learning theories, Theories of social organization and social change, theories of social stratification, Theories of individual and group behavior, Theories of deviance, crime and correction, Theories of economic growth and development, theories of group dynamics and leadership, Theories of social work (clinical practice) etc. and the legal model (an approach to social action and client advocacy, involving competition and conflict among adversaries). 26. For example, all Doctor on Demand physicians are board certified and licensed in the states in which they practice, according to DoctorOnDemand. Gilliland & R. There are more benefits to remote care: No more waiting in germ-filled waiting rooms. Cons of TelemedicineThere are a few disadvantages to telemedicine. These perspectives are consistent with a Family-Centered or Client-Centered approach, which is central to the standards of best practice with persons with disabilities and consistent with social 16. J. Patient Costs of TelemedicineTelemedicine is meant to significantly reduce health care service costs, according to eVisit. Two perspectives, the based primarily on include the various theories general systems perspective and psychodynamic interest And ego related to human development, the ecosystems perspective, as psychology. Why do we need theories in social work? In doing so, the model seeks to provide a framework for understanding the underlying causes of human degradation, powerlessness, and social inequality every- where in the world. There is nothing wrong in simplifying a concept, but if it ignores the complexities associated with the concept, that will end our further seeking. The NWOM asserts that the most serious problems confronting humanity are rooted in the fundamental inequalities that exist in the present world "order," i.e., in the system of international social, political, and economic institutions that govern relationships between nations and, within nations, between groups of people. By life tasks we mean the responses people make as they face the demands made upon them in various life situations, such is growing up in a family, entering school or work, raising a family, earning their daily bread, working in the industry, problems relating to job or earning, facing illness, accidents and death. Synthesis of knowledge from many sources, including personal experience. Most practice theories psychology, sociology, practice situation. The ideal theory for social work would feel like a puppet on strings, or perspectives of social encourages deep thinking and questioning, one that respects the inherent dignity of the client and complexity of social problems... Writing about social work theory, Beckett makes a connection with practice ...a set of ideas or principles used to guide practice which are sufficiently coherent that they could if necessary be made explicit in a form which was open to challenge. Perspectives represent what aspects of the session are emphasized or highlighted in a session (i.e. questions asked or time spent). While considering a theory or theories, social workers also understand its limitations too: Recognise that no single theory can explain everything: When a person engages in an action (or inaction) the reason for their behavior can be rooted in a range of causes or Limitations of Theories motives. Theories are based on evidence and reasoning, but have not yet been conclusively proved. Informal or natural resource system consists of family, friends, neighbors, co workers, etc 2. Provision of changing theoretical inputs to the social work knowledge base 3. A clear theoretical perspective guides Explanation: it suggests how different observations and influences might be linked and connected; it offers possible causal social work relationships between one event and another practice in five key areas Prediction: it indicates what might happen next Intervention: it suggests things to do to bring about change 19. Practice theories: sometimes called social work approaches or methods – how to go about doing social work 3. and efficient Theory, together with intuition is a way to develop personal style of professional practice...without barriers would feel like a support on strings, or perspectives of social characteristics of work may provide some answers to these its cliens questions 4. Some programs offer virtual therapy, according to United Healthcare. Always apply the value base to theory - much of the theory used in social care practice and social work is drawn from outside of the profession. An example anthropology, and the like. Formal resource system consists of membership in organizations, trade union organizations or other socio cultural organizations 3. Compilation and interpretation of social work definition accessible to the students (PD Mishra 1994) conveys a meaning that social work is a "helping" "assisting" „enabling" activity, which in turn suggests social work is seen as a benign and uncontentious activity, willingly accepted. They describe what the profession is all about and why it functions as it does. Like a camera are rooted in one or more economics, cultural lens, a perspective serves to orienting theories. Social resource system such as schools, hospitals, housing societies, police, banks etc Why people are unable to obtain the resources, services or opportunities in the resource systems, they may need to cope with their life tasks and realize their aspirations? That may be higher than your co-pay, but worth it in an emergency.Who Vets Telemedicine doctors? Telemedicine is meant to diagnose non-emergency situations, such as the cold, conjunctivitis and other minor health issues, you still want a qualified doctor.The American Medical Association (AMA) has a comprehensive set of ethical guidelines for professionals, facilities and companies using telemedicine, according to its website. MORE FROM QUESTIONSANSWERED.NET 1. Telemedicine and telehealth may be an attractive health care option with more tech-savvy patients with Internet access. Conflict Efforts directed at reducing: (1) grievances between persons or groups; or, (2) Resolution asymmetric power relationships between members of more powerful and less powerful groups. 5. Here's what you may experience when opting for a televisit with a doctor: You may be paired with a random health care provider that you don't like. Building up of new theories from the practice data The centre has recommended to include many different theories discretely and dispersaly but failed to do a wise selectivity of appropriate theories to be taught rationally and coherently and imparting knowledge of these theories compactly as an independent course that are taught in other disciplines eg. Or does it come from experience and creativity? 8 J. The model's primary goals are: 1) to provide remedial and preventive services to individuals, families, and groups whose optimal social functioning is either temporarily impaired or inter- rupted; and 2) to extend social protection to population groups that are threatened by exploitation or degradation. fellow human being? The polices and procedures of the resource system may inhibit / prevent it access (eg. Through the use of a smartphone, tablet or computer, you can participate in a virtual doctor's visit for diagnosis and treatment. This understanding fails to reflect the major transformations social work discipline has undergone as well as its global outlook. 11. Conceptual Frameworks Theories OF Social Work Theories FOR Social Work Orienting Theories Practice Frameworks Practice Perspectives Practice Theories Practice Models Theories of social work Focus on the profession and explain its purpose, domain, and character within the society. As such, it may not incorporate social work values and you should take responsibility for applying these Never be intimidated by theory.
